## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 23-43 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to independent claim 23, the prior art reference either alone or in combination fails to disclose, teach or suggest a fastening arrangement for a safety belt in a vehicle comprising; a holder is provided with a T-shaped head having arms that extend laterally relative to a longitudinal axis of said holder, a connector; a magnet and a magnetic field sensor disposed on said holder and said connector, first springs provided on outer longitudinal sides of said holder and said connector, wherein respective ones of said first springs extend between each of said arms of said holder and an oppositely disposed abutment of said connector, and wherein said first springs counteract a tension force of said safety belt or said belt buckle; and a compensation spring that is disposed between, and is respectively supported on, said holder and said connector, wherein said compensation spring, without a tension force acting on said connector prestresses said connector relative to said holder against nearly relaxed ones of said first springs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
